

PRIMER SAN TOMMASO

Primer for internal walls

.....

PRIMER SAN TOMMASO is a lime-based primer that prepares a surface for the application of paints, stuccos, plasters.

Properties

- Allows the bonding of marmorinos and internal decorative renders, (i.design MONOLYS for example) on various substrates (i.e. concrete, plasterboards, gypsum, old acrylic paints)
- It contains grains of sufficient size to accommodate a better bonding than smooth primers
- Easy to apply with a brush
- It can be applied on porous or non-porous surfaces
- PRIMER SAN TOMMASO is white, and prepares walls that are to be finished with thin white plasters
- PRIMER SAN TOMMASO can accommodate both finishing lime putty and natural hydraulic lime

Field of application

Prepares incompatible surfaces for the application of internal natural lime-based finishes

Application conditions

Temperatures above 5°C and below 30°C

Packaging

4-L plastic container

Coverage

5 to 7 m²/L depending on the substrate

Coverage

Roundtower Lime
